**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. The amendment filed 09/07/2004 has been entered.
2. Prosecution on the merits is reopened in view of the recently discovered references.
3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harlow, Jr. et al(4240517) or JP 62-266248 to Yamada et al in view of JP 8-276753 to Maeno et al.

Each of the principal references to Harlow, Jr. et al(4240517) and JP 62-266248 to Yamada et al discloses a vehicle with transversely mounted engine/transmission arrangements but does not disclose the use of an auxiliary vibration-damping member which is of the shearable or fracture type.

The secondary reference to Maeno et al.(JP 8-276753) discloses an auxiliary vibration-damping member of the shearable or fracture type. Compare Figure 3© of Maeno et al.(JP 8-276753) with instant Figures 6A and 6B.

It would have been obvious at the time the invention was made to one having ordinary skill in the art to which the invention pertains to modify each of the principal references to Harlow, Jr. et al(4240517) and JP 62-266248 to Yamada et al to include

an auxiliary damping member similar to that of Maeno et al along with the main vibration-damping members or in place of one of the main vibration-damping members in order to more effectively deal with vibration in the rolling direction or other direction so as to smooth out response to vibration as conditions change.

5. Claims 3, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Applicant's arguments with respect to claims 1, 2 and 4 have been considered but are moot in view of the new ground(s) of rejection.

7. Note JP 7-305742 to Ide and JP 61-188228 to Watanabe et al.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas C. Butler whose telephone number is 703-308-2575. The examiner can normally be reached on m-f 5:30 am to 2pm.
